

# Aman Sinha

+33 754-453-289 | aman.sinha@unige.ch | http://amansinha09.github.io/ | amansinha09 | Geneva, Switzerland

## Work Experience

|                                                                                                                                                                                               |                                          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|
| <b>Postdoctoral Researcher   DS4DH Lab, University of Geneva</b><br>Agentic AI for Healthcare   SLMs based CDSS, Biomedical NLP, Clinical Trials, Polypharmacy                                | Geneva, Switzerland<br>07/2026 - Ongoing |
| <b>Research Engineer   ATILF Lab, University of Lorraine</b><br>Multiword expression and Large language models   LMs Evaluation, Interpretability in LMs                                      | Nancy, France<br>10/2025 - 03/2026       |
| <b>Visiting Researcher   Helsinki-NLP Lab, University of Helsinki</b><br>Uncertainty paradigm for Medical domain   Uncertainty Quantification, Hallucination in LLMs, Interpretability in LMs | Helsinki, Finland<br>07/2024 - 10/2024   |
| <b>Research Engineer   ATILF Lab, University of Lorraine</b><br>Word Sense disambiguation and Knowledge Graphs   Lexical Resources, Graph neural networks, Deep Learning                      | Nancy, France<br>11/2020 - 06/2021       |
| <b>Research Intern   IBM Research Lab</b><br>Multi-task learning under heterogeneous supervision for semantic parsing   Semantic Parsing, NLP                                                 | Bangalore, India<br>05/2019 - 11/2019    |

## Education

|                                                                                                                                                                                                            |                                                |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------|
| <b>University of Lorraine - ICANS Strasbourg   PhD in Natural Language Processing</b><br>Thesis Topic: "Evaluation of Medical Lang. Models"   Advisors: Marianne Clausel, Mathieu Constant & Xavier Coubez | Nancy, France<br>10/2021 - 10/2025             |
| <b>IIT ISM Dhanbad   Integrated Masters in Mathematics and Computing</b><br>Thesis topic: "Multimodal Emotion Recognition"   Advisors: Badam Singh Kushvah & Ashutosh Modi                                 | Dhanbad, Jharkhand, India<br>07/2015 - 05/2020 |

## Selected Publications

- [1] F Gamba, **A Sinha** et al "Confabulations from ACL publications: A dataset for scientific hallucination detection" *LREC Main*, 2026. [\[Link\]](#)
- [2] R Agarwal, **A Sinha** et al "Modelling Irregularly Sampled Time Series Without Imputation" *TS4H WS@ NeurIPS*, 2025. [\[Link\]](#)
- [3] **A Sinha**, T Mickus, et al "Simplicity isn't as simple as you think" *Actionable Interpretability WS@ICML*, 2025. [\[Link\]](#)
- [4] T Mickus, **A Sinha** and R Vazquez "Your Model is Overconfident, and Other Lies We Tell Ourselves" *ACL Main*, 2025. [\[Link\]](#)
- [5] **A Sinha**, T Mickus, et al "Domain-specific or Uncertainty-aware (medical language) models" *BioNLP WS@ ACL*, 2024. [\[Link\]](#)
- [6] I Buhnla, **A Sinha**, and M Constant "Retrieve, Generate, Evaluate: A Case Study for Medical Paraphrases Generation with Small Language Models" *KnowledgeableLM WS@ ACL*, 2024. [\[Link\]](#)
- [7] A Jena, **A Sinha**, and R Agarwal "C-Net: Contextual network for Sarcasm Detection" *FigLang WS@ ACL*, 2020. [\[Link\]](#)

## Awards and Honors

|           |                                                                                   |
|-----------|-----------------------------------------------------------------------------------|
| May 2026  | Received <b>European Doctoral Label</b> degree.                                   |
| Feb. 2024 | Received <b>Dream PhD Mobility Funding</b> grant (5500 Euros)                     |
| Nov. 2020 | Awarded <b>Diversity &amp; Inclusion Award</b> for attending ACL 2020 conference. |
| Jun. 2015 | Qualified <b>JEE Advanced</b> : 1801th out of 124741 students.                    |

## Scientific Outreach

|                 |                                                                                         |
|-----------------|-----------------------------------------------------------------------------------------|
| WS Co-organizer | TAL-Sante 2026, CHOMPS-2025, MLP-LLM 2025, Mu-SHROOM 2025, CafeTAL meetups              |
| Conf. Volunteer | ACL 2025, NAACL 2021, AISTATS 2021.                                                     |
| Peer Reviewer   | ACL-SRW25, SemEval25, ARR Oct24, COLING24, Neurips Interpretable WS24, ICANN21, WNUT20. |
| Teaching        | Probability and Statistics; Machine Learning at IDMC, University of Lorraine.           |

## Skills

|                        |                                                                                                             |
|------------------------|-------------------------------------------------------------------------------------------------------------|
| <b>Programming</b>     | Python, C++, Unix, Latex, GitHub                                                                            |
| <b>ML Frameworks</b>   | PyTorch, Keras, TensorFlow, NLTK                                                                            |
| <b>Research Skills</b> | Natural Language Processing, Machine Learning, Deep Learning, Artificial Intelligence, Statistical Analysis |
| <b>Languages</b>       | English (Professional), French (A2), Hindi (Native)                                                         |
